Hi James,

So I redid the tube sampling yesterday. The Philips results look normal for this run so I would suggest ignoring the data from the Jan 25 and use this data instead. Also the SidePak data has the wrong time. You need to take off an hour and 2 minutes.

Hi James,

I have attached the data from Jan 25 for the Philips, microAeth, and SidePak. There appears to be something weird about the Philips data. I am going to redo the sampling since I am testing the comparison between the Philips and the TZOAs.

Let me know if you need anything else or what data from the resampling.

Great, thanks. Um. Let's say Monday? I'll come down to your office at like 9:30 and we can sort out the equipment?

Hi James,

I am happy to do those segments. I can do Tuesday or Monday, if that works for everyone.

Hi Martha,

Just talked to Ian's student. They are going to do the Hammersmith & City section of monitoring for me - I'm just waiting for them to confirm which day next week.

If the offer is still there to do the top section of the Northern Line and Victoria line that would be great please? It's the sections I've crudely highlighted on the attached map. If so, when do you think you might be able to do it? I think you thought next week maybe sometime?

Thanks

James

Hi James,

I will be at the journal club tomorrow and I am free to talk after.

Hi Martha,

Thanks for offering to help with some underground monitoring. I'm at home today, but maybe we can have a chat about it tomorrow? I'll be at journal club 12-1 if you'll be around after that perhaps?

Thanks

James

Hi Ben,

I can monitor next week.

I need to talk to you about the TZOs tomorrow though.

Hi Martha,

We discussed last week the possibility of you doing some monitoring on the Underground. However, I recognise that I've loaded you up with a number of other things. Do you think you'd be able to do a morning or two of monitoring next week? It would be with a Sidepak, a Microaeth and the Philips. It would be worth taking the two working Tzoas with you too.

Let me (and James, cc'd) know.

Thanks,

Ben
